

Mercan®

SINCE 1995

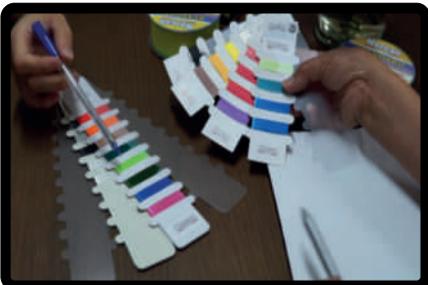

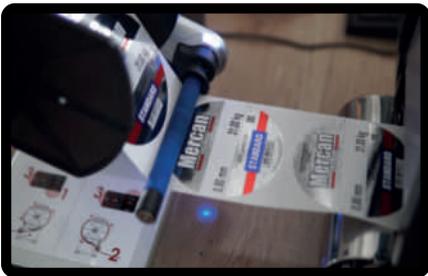

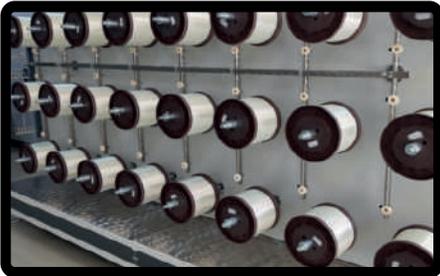

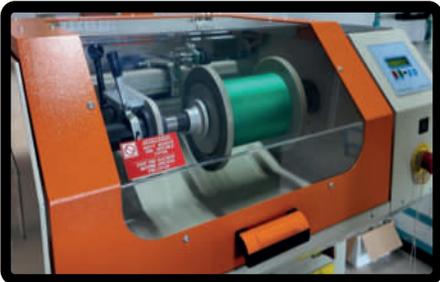

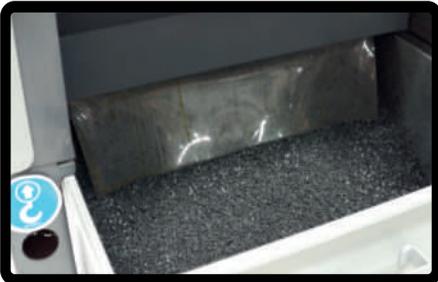

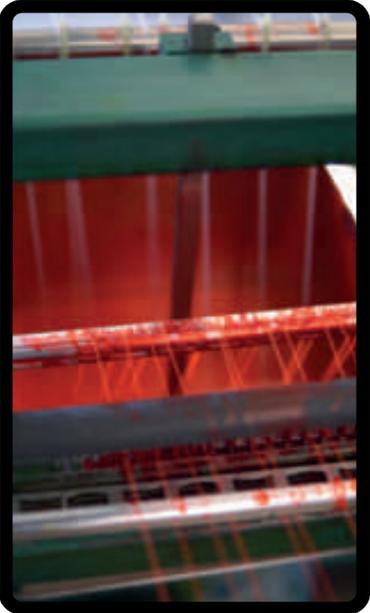

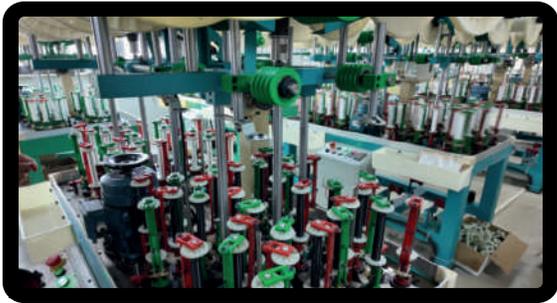

About US

Mercan Fishing Line meets the needs of amateur and professional fishermen in the Monofilament Nylon, Fluorocarbon and Braided Line categories. Thanks to its experienced staff and the test laboratory it has, it tests its fishing lines at every stage and offers its customers the highest quality products and service.

Mercan Ltd., which also carries out OEM work in addition to its own brand, also provides its customers with the chance to choose products suitable for their own markets with its products in various categories and quality. The selected products are brought to the most suitable form to appeal to the customers' own markets with design studies, packaging and labeling processes specially made for the customers.

STEP 1
Select line

STEP 2
Select spool

STEP 3
Select label

STEP 4
Select box

01 What is OEM?

OEM products a-madre tail ore for the brand manufacturers.and can only use the brand name after production, and can never be crowned with the manufacturer's own name for production.

02 What is the OEM process?

First, select line. Second, select spool Third, select label. Fourth, select packing box.

03 How much quantity can be OEM?

We have three options for reference.
Choose the colors, sizes, and spools of commonly used fishing lines.
The number and color of fishing line can be customized as required. The label can be customized as required
The color, size and spool labeling of the fishing line can be customized.
The larger the number, the wider the range of customizations.

WHY CHOOSE US

Mercan Ltd., which also carries out OEM work in addition to its own brand, also provides its customers with the opportunity to choose products suitable for their own markets with its products in various categories and quality. The selected products are brought to the most suitable form to appeal to the customers' own markets with the design studies, packaging and labeling processes carried out specifically for the customers.

05

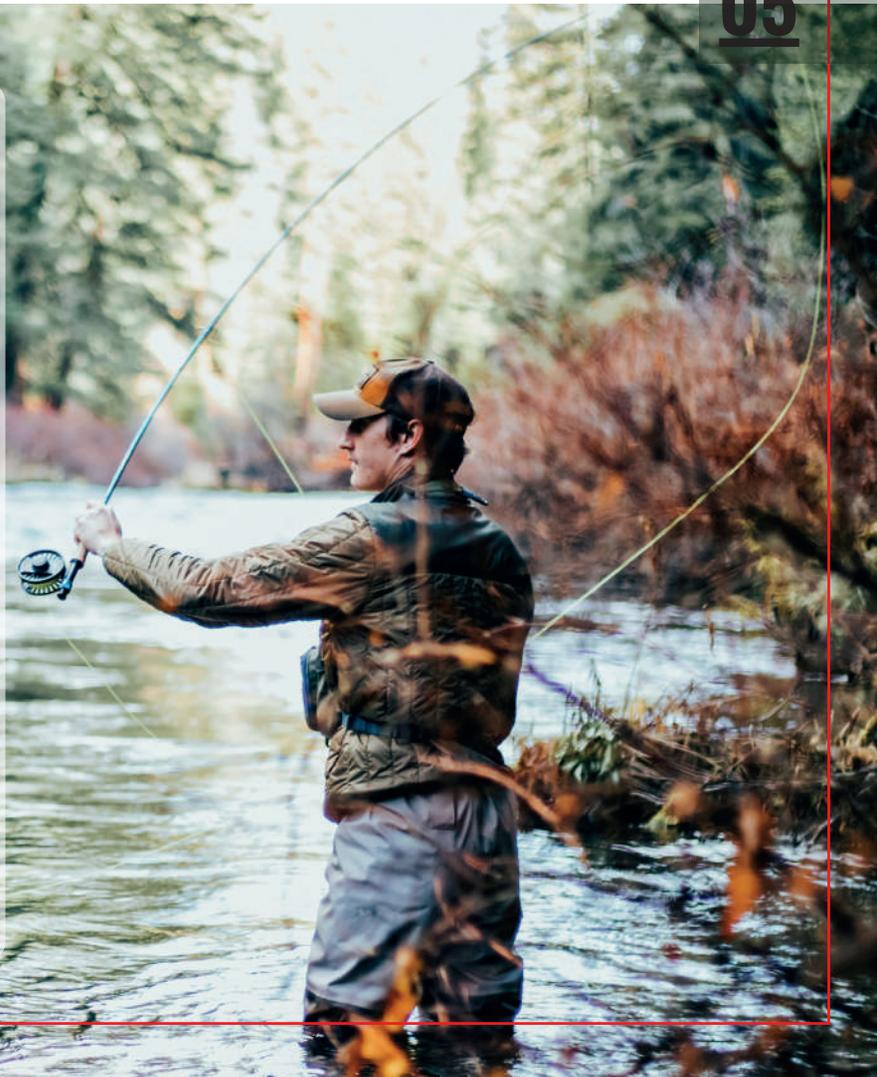

Ultra-strong, ultimate strength: this braided fishing line is composed of 8 strands Ultra High Molecular Weight Polyethylene Fiber(UHMWPE), manufactured to the highest quality standards

The advanced braid fishing wire construction boasts highly sensitivity and zero stretch that detects light bites and has low memory for outstanding castability and handling, and the fishing string holds up tight allow you to easily tie a more solid knot

This braided fishing thread are superior abrasion resistance, ultra sensitive with near zero stretch, low memory and thin diameter for easy casting and handling

The extra-small diameter and enhanced color protection help with finesse presentations and keep it hidden from fish in the long term

Perfect applicatable for any situation in saltwater and freshwater, sea fishing, lake fishing, ice fishing etc

OEM

Original Equipment Manufacturer

CREATE YOUR BRAND - OEM WORKS

Apart from manufacturing and selling our brand, we have a wide range of OEM customers.

It is a good opportunity to create a product according to your market demands. Wholesalers and distributors can select from different kinds of lines, spools and package to present their customers.

Information and technical data in the catalogue can help you determine the type of line that corresponds your needs. After examining the products in our catalogue, please let us know your preference about the colour, spool and package type and quantity you want. We will prepare a special price according to your needs.

We are ready to serve you with qualified product and thirty years old background !!!

CREATE YOUR BRAND STEP BY STEP

1. Select a suitable product that meets your and your market's needs. You can see different kinds of product in three category

- Monofilament
- Fluorocarbon
- P.E Braid

2. Determine diameter and length of the product, you can find related information about available diameter and length in the table below the description of products.

3. Choose the colour of the line. Available colors is indicated in the catalogue.

4. Choose the spool size

We have different kinds of spool for different diameters and meters. The kind, the diameter and meter of the line are important factors to decide the appropriate spool. When you decide the diameter and meter of the line we will present you options for spools
